Rando® HD  
Premium Anti-Wear Hydraulic Fluid  

Product highlights:

• Robust anti-wear additive protects equipment
• Rust and oxidation inhibitors help to prevent deposits and minimize downtime
• Good hydrolytic stability and water separation help with smooth operation

Product description

Rando HD are efficient performance anti-wear hydraulic fluids designed for use in both mobile and stationary high pressure hydraulic systems.

Customer benefits

• Protects equipment
  Robust anti-wear additive package minimizes wear by protecting surfaces when load causes breakdown of the lubricant film.

• Minimizes downtime
  Rust and oxidation inhibitors help to prevent the production of abrasive particles from rust formation, and deposits, varnishes and sludges from oil breakdown, which can damage equipment surfaces and seals, and block filters prematurely.

• Smooth operation
  Good hydrolytic stability and water separation characteristics promote excellent filterability in the presence of water contamination. Good anti-foam and air release properties help ensure smooth operation and system efficiency.

Applications

• Industrial hydraulic systems
• Hydraulics of mobile and construction equipment where a water separating oil is required
• Hydraulic systems with vane, gear or piston pumps
• Plastic injection molding machines
• Machine tools
• Enclosed gear systems (dependent on load)
• Industrial circulating systems
